
Mango Pepes

Social Trading Art

The idea behind the Pepe derivatives was from an understanding that traders have for used the original pepe as a means of fun communication for years now.

Therefore, it was a natural extension for Mango Markets as the decentralized traders platform to have its own stylized meme-able pepes.

I've created a repository here: <https://github.com/Mango-Heroes/mango-pepes>

We will continue to add over time but these are some of my favorite. They aren't mintable NFTs and that was really the intention—for them to be free, circulate, and join in the trading culture.
